Challenge the future

[I] shadowamazon 8 points 1 year ago*

Chinese here, according to the info presented in the side note, the situation is very confusing here. The left side note from the top to the bottom are written in 3 sections. The top section provided a date which this painting was PRINTED (not painted). The date is 明治 + 16, so that's 1868 + 16. The year is 1884.

The second section say, it's copy righted. (I am not sure how prevalent the concept of copyright was in 1868 in Japan)

The third section gives an address of the publisher, an address in Osaka Japan.

Everything is written in calligraphy that can be Japanese or Chinese. To be all honest, I think this may be some kind of cheap knock off. If you go to China, you can find all kind of products with English printed all over the packaging, but if you try to read it, the language makes no sense at all.

[I] pallum 1 point 1 year ago

personally, I would go with the scarlet minivet. Native to china, and with a very similar color scheme. I would mostly suggest this due to the tail, which has black in the center and orange on the outer feathers, much like the minivet. While the general shape is a bit off and the mask is different, this picture looks quite similar:

What do you guys think of the Daurian Redstart. Seems to have the same color patterns, the only thing I'm missing is the white ring around the eyes: http://en.wikipedia.org/wiki/Daurian_Redstart
The flower looked familiar to me as an iris, so I searched irises through google images and am fairly confident it is an iris. I also researched a little about irises art of the Madonna from the Renaissance and irises in Madonna depictions seem to be fairly common in Northern Europe (Flemish) art at this time.

I have a flower tattoo on my foot that looks like the one in this photo, therefore, I believe it to be a lily.

Painting to label

Candidate labels: Select the label that has the most similar scene/subject as the painting:

- Townscapes
- Animal paintings
- Landscapes

Landscapes

Creative works that depict outdoor scenes where the picture is dominated by the configuration, visual and aesthetic, of the land, bodies of water, and natural elements. When the ocean or other large body of water dominates the picture, use "seascapes." For actual areas of land having certain notable characteristics, use "landscapes (environments)."
